SUMMARY

I am a junior Full Stack Developer with more than 6 months of working experience. My job is to craft SaaS, custom web solutions and robust backend solutions using MERN Stack, familiar with RESTful APIs, GraphQL, authentication systems. Currently, expanding my expertise in system design, ERP, CRM, scalable architecture and backend engineering.

EDUCATION

B.S. Information Technology

Bahria University Karachi, Pakistan

Spring 2022 - Fall 2025

- **Final Year Project:** Road Assist App
- **Semester Projects**
 1. Ecommerce Web App
 2. Retailer App
 3. Centralized College Database

CERTIFICATION

Mobile and Web App Development

Saylani Mass IT Program

Nov 2024 – Feb 2026

- **Hackathon:** Pitch Craft
- **Projects**
 1. Ecommerce
 2. OLX
 3. Todo App

EXPERIENCE

Full Stack Intern

Feb 2026 – Apr 2026

Z.A IT Park

- Built responsive websites and reusable UI components using React Js and Tailwind CSS.
- Implemented CRUD operations, server side validation and error handling.
- Maintained clean, scalable and production ready code following best practices and reusable code structure.

Software Engineer

May 2026 – July 2026

Saylani Tech Limited

- Developed full stack web applications using PostgreSQL, MongoDB, Express Js, React Js and Node Js.
- Built RESTful APIs, authentication and efficient database schemas to support scalable full stack applications.
- Created responsive and accessible user interfaces using Tailwind CSS ensuring consistent design and smooth experience across all devices.

Full Stack Developer

Aug 2026 – Present

UA Technologies

- Built responsive mobile applications and reusable UI components using Flutter and Dart.
- Developed clean, scalable and production ready Flutter code by following industry best practices, modular architecture and reusable component structures.
- Developed RESTful APIs using Node.js, Express.js, and MongoDB, implementing request handling, data validation and error handling.

PROJECTS

ScrapeFlow Automation

9 Weeks

A workflow based web scraping solution where each node represents a specific operation. You can design your own custom workflow by connecting different nodes, then run it manually whenever needed or schedule it to run automatically at predefined intervals.

- **Tech Stack:** ReactFlow, Next Js, MongoDB, Selenium, TailwindsCss
- **Link:** github.com/asimbukc/scrapeflow-automation

DevForum

12 Weeks

Devflow is a developer forum allowing users to share coding problems, solutions and reusable UI components. Implemented features such as post creation, register issues, give solutions, update profile and real time home feed to keep discussions active and searchable.

- **Tech Stack:** MongoDB, Express Js, React Js, RTK Query, Node Js, Shadcn, TailwindCss.
- **Link:** github.com/asimbukc/DevForum

RELEVANT COURSES

- Object Oriented Programming
- Data Structures and Algorithms
- IT Infrastructure
- Database Management Systems
- Software Engineering
- Data Communication and Networking
- System and Network Administration
- Cyber Security
- Data Mining
- Software Quality Assurance

TECHNICAL SKILLS

FrontEnd

- ReactJs, NextJs
- TailwindCss, Bootstrap
- Redux Toolkit, Zustand
- Tanstack Query

Database

- PostgreSQL, MySQL
- MongoDB, Redis
- Prisma

Frameworks and Platforms

- Flutter
- Shopify
- Git, Github

Backend

- Node Js, Express Js
- Supabase, Firebase
- JWT, OAuth
- Rest API, GraphQL

DevOps

- Amazon Web Service
- Vercel, Render
- Docker

Languages

- JavaScript
- TypeScript
- Dart
